

# Adaptation Plan Evaluation Report

Mukund Balaji Srinivas — u7274095

## **Abstract**

This section provides a brief summary of the evaluation report, outlining the key question being addressed, methods used, and main conclusions.

# Introduction

---

Climate change in India affects multiple facets of the ecosystem, including oceans (Marathe, Terray, and Karumuri, 2021). coastal regions (Gupta et al., 2018), water resources (Amano, 2021) and forests (Lele and Krishnaswamy, 2019). Additionally, it significantly impacts agriculture (Kumar et al., 2023), urban areas, public health(Intergovernmental Panel On Climate Change (Ipcc), 2023), and energy infrastructure, creating complex challenges that require coordinated responses.
